DEPARTMENT OF COMPUTER SCIENCE & DESIGN

MINI PROJECT- 5th Sem

Sub-Code: BCG586

ABSTRACT

TITLE OF THE PROJECT	**Data Encryption and Decryption Tool**	
TEAM MEMBERS FOUR	**NAME**	**USN**
	Kiran kumar N A	**1MP22CG026**
	Santhosh S M	**1MP22CG048**
	Tharun K L	**1MP22CG057**
	Jagadish kumar N	**1MP23CG401**
DOMAIN NAME	**Cyber Security**	
NAME OF THE GUIDE	**Dr. Chandrakala HL**	

The **Data Encryption and Decryption Tool** employs a hybrid cryptographic approach using **AES** and **RSA algorithms** to secure sensitive data. **AES (Advanced Encryption Standard)** is used for fast and efficient encryption of large data sets like files and images, while **RSA (Rivest-Shamir-Adleman)** ensures secure keys exchange. The tool is specifically designed for applications such as **file, text, and picture encryption and decryption**, making it versatile for various industries. It supports multiple data formats, providing robust protection for documents, images, and text messages. With its intuitive interface, users can easily encrypt and decrypt data, ensuring high-level confidentiality. This is ideal for securing personal, corporate, or sensitive information, complying with data protection standards, and is suitable for fields such as finance, healthcare, and secure communications.
